SHORTENED STATUTORY PERIOD OF RESPONSE	MAIL DATE	DELIVERY MODE
3 MONTHS	04/10/2007	PAPER

**Please find below and/or attached an Office communication concerning this application or proceeding.**

If NO period for reply is specified above, the maximum statutory period will apply and will expire 6 MONTHS from the mailing date of this communication.

**Office Action Summary**

Application No.

09/707,770

Applicant(s)

CHENG ET AL.

Examiner

Jinsong Hu

Art Unit

2154

– The MAILING DATE of this communication appears on the cover sheet with the correspondence address –

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.138(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 23 November 2005.
- 2a) ☒ This action is FINAL. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 4) ☒ Claim(s) 1-15,33-46,58-73 and 106-120 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-15,33-46,58-73 and 106-120 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

**Priority under 35 U.S.C. § 119**

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some \* c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
  2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

**Attachment(s)**

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)  
Paper No(s)/Mail Date \_\_\_\_\_
- 4) ☐ Interview Summary (PTO-413)  
Paper No(s)/Mail Date. \_\_\_\_\_
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: \_\_\_\_\_

### **DETAILED ACTION**

1. Claims 1-15, 33-46, 58-73 and 106-120 are presented for examination. Claims 1, 33, 58, 106-109, 113 and 117 have been amended.

#### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-15, 33-46, 58-73 and 106-108 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Applicant replaced the "reformatting" step in the claims 1, 33 and 58 with the "filtering" step and added a new "filtering" step in claims 106-109, wherein the "filtering" step was not described in the specification.

#### ***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 2154

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1-7, 9-10, 14, 33-38, 40-41, 45, 58-65, 67-68, 72, 109-111, 113-115 and 117-119 are rejected under 35 U.S.C. 102(e) as being anticipated by Greer et al. (US 6,247,048).

6. As per claim 1, Greer teaches the invention as claimed including a method for extracting and reformatting web page content into a format readable on a mobile device [col. 1, lines 7-12; col. 6, lines 16-20], comprising the steps of:

providing a secure connection between a mobile device and a proxy server [410, Fig. 4; col. 6, lines 39-52];

generating a user request from the mobile device to the proxy server for a web page having a first format, wherein the web page resides on an origin web server [420, Fig. 4; col. 6, lines 32-36 & 60-64; col. 9, lines 10-12];

forwarding the user request from the proxy server to the origin web server [430, Fig. 4; col. 6, line 65 – col. 7, line 6; col. 9, lines 13-17];

receiving at the proxy server the web page from the origin web server [440, Fig. 4; col. 7, lines 7-10; col. 9 lines 18-19];

extracting at the proxy server desired content from the web page, filtering [i.e., transcoding the content, eliminating useless part of the original content] the desired content in accordance with a screen limitation [i.e., client character set , col. 8, lines 1-22; col. 4, lines 26-40] associated with said mobile device the desired content is viewable on [col. 7, lines 13-19; col. 9, lines 24-26 ]; and

transmitting to the mobile device the filtered desired content using the secure connection [col. 7, lines 20-26; col. 9, line 27].

7. As per claim 2, Greer teaches the step of identifying portions of source code corresponding to the desired content of the web page, wherein the source code is comprised of objects [col. 6, lines 32-36] and creating at least one expression using at least one predefined extraction method, wherein the expression extracts an object referenced in the at least one expression [col. 7, lines 13-19].

8. As per claim 3, Greer teaches the step of storing the reformatted web page in a cache prior to said step of transmitting [col. 7, lines 23-26].

9. As per claim 4, Greer teaches the step of storing the web page having the first format in a cache prior to said step of extracting [col. 7, lines 11-13].

Art Unit: 2154

10. As per claim 5, Greer teaches reformatting is applied in accordance with predetermined instructions for at least two mobile devices having a predefined common characteristic [col. 6, lines 7-8].

11. As per claim 6, Greer teaches the predefined characteristic is least one of a type of operating system, a type of browser, and a manufacturer [col. 5, lines 30-32].

12. As per claim 7, Greer teaches the reformatting step is applied in accordance with predetermined instructions to a particular mobile device [col. 7, lines 13-19].

13. As per claims 9 and 10, Greer teaches the reformatting is applied in accordance with predetermined instructions for a particular web page or all web pages [col. 7, lines 10-19].

14. As per claim 14, Greer teaches the reformatting step comprises at least one of adding meta tag information to a header of the web page, adding a specific attribute and an attribute value to a specific tag associated with the web page, ignoring a previously specified global conversion, inserting text into the web page from a specified file, removing a specific attribute from all tags associated with the web page, removing a specific attribute from a specific tag associated with the web page, removing a comments tag from the web page, removing a portion of the content from the web page, removing a specific tag from the web page, removing a specific tag and all the

Art Unit: 2154

information that appears within the tag from the web page, replacing a first tag associated with the web page with a second tag associated with the web page, setting a specific value of a specific attribute of a specific tag, stopping processing of subsequent reformatting commands, substituting a first sequence of text for a second sequence of text, and removing table formatting [col. 7, lines 26-67].

15. As per claims 33-38, 40-41 and 45, since they are system claims of 1-7, 9-10 and 14, they are rejected for the same basis as claims 1-7, 9-10 and 14 above.

16. As per claims 58-65, 67-68 and 72, since they are program claims of 1-7, 9-10 and 14, they are rejected for the same basis as claims 1-7, 9-10 and 14 above.

17. As per claim 109, Greer teaches a method for extracting and reformatting web page content into a format tailored for a mobile device, comprising of providing a connection between said mobile device and a proxy server [410, Fig. 4; col. 6, lines 39-52]; providing client device related information to said proxy server from said mobile device, said client device related information comprising at least one of a content viewer and operating system [col. 8, lines 5-8 & 22-25], retrieving content requested by said mobile device from said proxy server [420, Fig. 4; col. 6, lines 32-36 & 60-64; col. 9, lines 10-12], conversion of said content based on said client device related information [col. 7, lines 13-19; col. 9, lines 24-26 ], and forwarding said converted content to said client device [col. 7, lines 20-26; col. 9, line 27].

Art Unit: 2154

18. As per claim 110, Greer teaches the client device related information sent to the proxy server from the mobile device is provided in a header [col. 7, lines 26-67].

19. As per claim 111, Greer teaches the step of comparing said client device related information [i.e., client character set] to a client value [i.e., the character used in the response] stored in said proxy server for said client device [col. 8, lines 33-44].

20. As per claims 113-115 and 117-119, since they are system and apparatus claims of claims 109-111, they are rejected for the same basis Greer claims 109-111 above.

***Claim Rejections - 35 USC § 103***

21. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

22. Claims 8, 11-13, 15, 39, 42-44, 46, 66, 69-71, 73, 112, 116 and 120 are rejected under 35 U.S.C. 103(a) as being unpatentable over Greer et al. (US 6,247,048) as applied to claims 1-7, 9-10, 14, 33-38, 40-41, 45, 58-65, 67-68, 72, 109-111, 113-115 and 117-119 above in view of Official Notice.

23. As per claims 8, 112, 116 and 120, Greer teaches the invention substantially as

Art Unit: 2154

claimed in claim 1. Greer does not specifically teach defining the mobile device by the manufacturer and model. However, "Official Notice" is taken that both the concept and advantages of providing for defining the mobile device by the manufacturer and model is well known and expected in the art. It would have been obvious to a person of ordinary skill in the art to defining the mobile device by the manufacturer and model in Greer's system because it would make the reformatting less complicated by providing the corresponding information of mobile device that can be used as reformat converting reference.

24. As per claims 11-13 and 15, Greer teaches the invention substantially as claimed in claim 1. Greer does not specifically teach the secure connection is a secure socket layer connection through a gateway. However, "Official Notice" is taken that both the concept and advantages of providing for secure socket layer connection is well known and expected in the art. It would have been obvious to a person of ordinary skill in the art to include secure socket layer connection in Greer's system because it would improve the security of the system by provide a secure communication path for entire system.

25. As per claims 39, 42-44 and 46, since they are system claims of 8, 11-13 and 15, they are rejected for the same basis as claims 8, 11-13 and 15 above.

Art Unit: 2154

26. As per claims 66, 69-71 and 73, since they are program claims 8, 11-13 and 15, they are rejected for the same basis as claims 8, 11-13 and 15 above.

27. Claims 106-108 are rejected under 35 U.S.C. 103(a) as being unpatentable over Greer et al. (US 6,247,048) as applied to claims 1-7, 9-10, 14, 33-38, 40-41, 45, 58-65, 67-68, 72, 109-111, 113-115 and 117-119 above, in view of Knutson (US 2002/0087416).

28. As per claims 106-108, Greer teaches the invention substantially as claimed in claim 1. Greer does not specifically teach the step of filtering the web page content in accordance with a limitation associated with the mobile device the web page content is viewable on. However, Knutson on the other hand teaches the step of filtering the web page content in accordance with a limitation associated with the mobile device the web page content is viewable on [par. 19]. It would have been obvious to a person of ordinary skill in the art at the time the invention was made to combine the teaching of Greer and Knutson because doing so would increase the efficiency of entire system by eliminating useless data in advance reformatting step.

### ***Conclusion***

29. Applicant's arguments with respect to claims 1-15, 33-46, 58-73 and 109-120 have been fully considered but they are not deemed to be persuasive.

In the remarks, applicant argued in substance that

(1) Greer does not teach the step of filtering the web page content in accordance with a limitation associated with the mobile device the web page content is viewable on in claims 1-15, 33-46, 58-73;

(2) Greer does not teach the newly added limitation, inter alias "filtering the web page content in accordance with a limitation associated with the mobile device the web page content is viewable on" in claims 106-108;

(3) Greer does not teach the client device related information comprising at least one of a content viewer and operating system.

30. Examiner respectfully traverses applicant's remarks:

A. As to point (1), applicant fails to consider the teaching of the Greer's reference for transcoding the received content in accordance with a limitation associated with the mobile device, i.e., filtering the useless part in the original content in accordance with a limitation associated with the mobile device. Thus, Greer does teach the limitation in claims 1-15, 33-46, 58-73.

B. As to point (2), applicant's arguments with respect to claims 106-108 have been considered but are moot in view of the new ground(s) of rejection.

C. As to point (3), applicant fails to consider the teaching of the Greer's reference for providing the information regarding the client character set [col. 5, lines 17-20; col. 8, lines 5-8 & 22-25], i.e., the client related information is about the content viewer on the client device, which is also related to the client device operating system. Thus, Greer does teach the limitation in claims 109-120.

Art Unit: 2154

Accordingly, Greer is still a relevant prior art reference.

31. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, THIS ACTION IS MADE FINAL. See MPEP §706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

32. A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

33. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jinsong Hu whose telephone number is (571) 272-3965. The examiner can normally be reached on 8:00 AM - 5:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John A. Follansbee can be reached on (571) 272-3964. The fax phone number for the organization where this application or proceeding is assigned is (571) 273-8300.

Art Unit: 2154

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
